REFRACTORIES MANUAL 2007

The aim is:

To give all experts involved in refractories a platform to discuss refractory problems – worldwide

The concept is:

1. State-of-the-art papers give an overview on the situation of refractory materials in special fields of application and the requirements needed for these applications, e.g. cement industry, steel industry etc.
2. Papers on special technologies (not older than 3 years) give insights in the development of refractory materials, e.g. gunning mixes or castables
3. Papers on the refractories industry in special countries elucidate the situation within special areas of the world.

The readers are:

Experts not only in the refractories manufacturing industries of the world but also specialists in the different fields of the industries using refractory materials

For advertisers:

They can reach all people concerned with refractories as well in the refractories industry of a special country as the users of refractories, too, to help them solve their problems with refractory materials in use.

Distribution:

10,000 copies to be distributed worldwide to refractory experts and on all refractory events
